METCLEAN

MAINTENANCE TICKLIST · DPF LITE

KEEP YOUR DPF LITE CLEAN, WASH AFTER WASH

A small tank of clean water with One Shot mixed in, pushed through the filter by workshop compressed air. One fill serves only a couple of cleans. Print the tick sheets as often as you need.

YOUR MACHINE

METClean DPF Lite

SERIAL NUMBER _____ SITE _____ INSTALLED _____

YOUR SCHEDULE

Counted in cleans. These are a guide: they depend on how heavily the machine is used and on what you clean.

ITEM	WHEN	WHAT TO DO
Wash water	**Every 2 cleans**	Isolate, empty and clear the sump; clean the tank; refill with clean water and One Shot.
One Shot	**Every tank fill**	Mix in as the One Shot off-vehicle instructions describe.
Filters	**At each water change**	Inspect, clean or change as your operating instructions describe.
Sludge and spent filters	**When removed**	Dispose of through your licensed waste route.

ISOLATE FIRST

Disconnect from the mains (and air, where used), lock off the supply and remove anything attached before you drain, open or clean anything. Gloves, safety glasses and protective footwear.

OILY FILTERS

A heavily contaminated or oily DPF loads the small tank quickly. Ask our technical team before cleaning one, and change the water straight after.

STOP AND CALL US

Damaged electrical equipment, a leak you can't trace to a loose connection, a heater that keeps tripping, or a fault that comes back after you've cleared it. Have the model, serial number, what the machine was doing and a photo or video ready.

TICK SHEET · DAILY

DAILY CHECKS

METClean DPF Lite. A few minutes before the first clean of the day. Anything that fails: don't run the machine, report it, and call us if you can't fix it.

WEEK STARTING _____ SERIAL NUMBER _____ CHECKED BY _____

BEFORE THE FIRST CLEAN	MON	TUE	WED	THU	FRI	SAT
Compressed air connected; gauge reads at least what the DPF Lite needs	☐	☐	☐	☐	☐	☐

TIP

Inspect the filters each time you empty the tank, and note anything unusual, such as oily water or a filter that wouldn't clear, in the margin for when you call us.

METCLEAN

TICK SHEET · SERVICE

SERVICE AND WASTE

METClean DPF Lite. An outline of each job to tick off as you go. Follow the full instructions for your machine, with their safety section, and only after training.

WATER CHANGE

- [ ] **Isolate**
  Power and air off; filter removed.
- [ ] **Empty the tank**
  Into containers for licensed disposal.
- [ ] **Clear the sump**
  Remove the ash and sediment from the bottom of the tank.
- [ ] **Clean the tank and filters**
  Inspect, clean or change the filters as instructed.
- [ ] **Refill**
  Clean water with One Shot, as the off-vehicle instructions describe.
- [ ] **Log the fill**
  Note the date on the fill log.

DATE _____ CLEAN COUNT _____ INITIALS _____

WASTE RECORD

Sealed, labelled containers until collection. Never to ground, surface water or an ordinary drain. Used water with One Shot, sludge and spent filters through your licensed waste route. Treat them with the same care as used coolant and engine oil.
